

FlowSync – Data Export & Privacy Policy

1. Overview

This document defines the data export, deletion, ownership, and retention policies for FlowSync, a B2B SaaS productivity platform.

It ensures compliance with enterprise customer expectations and privacy standards similar to GDPR-style data protection principles.

This policy is used by both support teams and AI-driven agents to handle data-related customer requests consistently and securely.

2. Data Ownership Rules

2.1 Customer Data Ownership

- Customers retain full ownership of their data stored in FlowSync
- FlowSync acts as a data processor, not the owner
- Data includes projects, files, messages, integrations, and analytics

2.2 Internal System Data

- System logs, monitoring data, and anonymized analytics are owned by FlowSync
 - These are used for performance, debugging, and security purposes
-

3. Data Export Requests

3.1 Supported Export Types

Customers can request export of:

- Account profile data
- Projects and tasks
- Files and attachments
- Activity logs
- Integration data

3.2 Export Process

1. User submits data export request
2. System verifies account ownership
3. Export job is queued in backend system
4. Data is compiled into downloadable format (JSON/CSV/ZIP)
5. Secure download link is generated
6. Link is sent via registered email

3.3 Processing Time

- Standard exports: 24–72 hours
- Large enterprise datasets: up to 5–7 business days

3.4 Export Limitations

- Rate-limited to prevent abuse (max 1 export request per 7 days per user)
 - Extremely large datasets may be partially chunked
-

4. Data Deletion Requests (GDPR-Style)

4.1 Deletion Types

- Soft Deletion: Data is disabled but recoverable for a limited period
- Hard Deletion: Permanent removal from all systems

4.2 Deletion Process

1. User submits deletion request
2. Identity verification is performed
3. System checks legal/compliance constraints
4. Data is flagged for deletion
5. Deletion executed across all services

4.3 Deletion Timeline

- Soft deletion retention period: 30 days
- Hard deletion completion: up to 90 days (for backup purge cycles)

4.4 Exceptions

Data cannot be immediately deleted if:

- Legal compliance holds are active
 - Billing or financial records are under audit
 - Enterprise contractual retention applies
-

5. Data Retention Policy

5.1 Active Accounts

- Data is retained as long as the account is active
- Regular backups are maintained for disaster recovery

5.2 Deleted Accounts

- Soft deleted data retained for 30 days
- After retention period, data is permanently erased

5.3 Backup Storage

- Backups are retained for up to 90 days
 - Backup data is encrypted and not directly accessible
-

6. Account Data Access Rights

Users can request:

- What data is stored about them
- Where their data is hosted (region-level information)
- Access logs and activity history

FlowSync provides transparency through:

- Data export reports
 - Activity dashboards
 - Audit logs (enterprise only)
-

7. Data Security Measures

- All data is encrypted at rest and in transit
 - Access controlled via role-based permissions (RBAC)
 - Audit logs track all data access events
 - API access requires authenticated tokens
-

8. Enterprise Exceptions

Enterprise customers may have custom agreements:

- Extended retention periods
- Dedicated data storage regions
- Custom deletion workflows
- Legal hold configurations

These override standard policy rules where applicable.

9. Common Support Scenarios

9.1 Data Export Requests

"I want to download all my data"

→ Trigger export workflow → verify identity → generate secure export link

9.2 Data Deletion Requests

"Delete my account permanently"

→ Verify user identity → check compliance constraints → initiate deletion pipeline

9.3 Data Location Queries

"Where is my data stored?"

→ Fetch region info → return data residency details

10. AI System Usage (Agentic Integration)

This policy is used by AI agents to:

- Process data export requests automatically
 - Validate deletion eligibility
 - Enforce retention rules
 - Escalate legal or compliance-related requests
 - Generate structured responses for privacy queries
-
