

FlowSync – Refund Policy

1. Overview

This document defines the official refund policy for FlowSync, a B2B SaaS productivity platform. It outlines refund timelines, eligibility criteria, enterprise exceptions, and approval thresholds used by both automated systems and support agents.

2. Refund Timelines

2.1 Standard Refund Window

- Monthly subscriptions: Refunds eligible within **7 days** of initial purchase or renewal
- Annual subscriptions: Refunds eligible within **14 days** of purchase

2.2 Processing Time

- Approved refunds are processed within **5–10 business days**
- Payment gateway delays may extend actual credit time depending on bank/provider

2.3 Partial Refunds

- Partial refunds may apply for mid-cycle cancellations
 - Usage-based deductions may be applied before refund calculation
-

3. Refund Eligibility Criteria

Refunds are eligible under the following conditions:

3.1 Eligible Cases

- Duplicate billing or accidental double charge
- Service not activated after payment
- Critical system failure affecting core functionality
- Subscription cancellation within refund window

3.2 Ineligible Cases

- Requests beyond refund window
 - Feature dissatisfaction without technical failure
 - Change of mind after significant usage
 - Violation of Terms of Service
-

4. Enterprise Exceptions

Enterprise customers are subject to custom contractual agreements.

4.1 SLA-Based Adjustments

- Refunds may be issued if SLA (Service Level Agreement) breaches occur
- Compensation may be in form of service credits instead of cash refunds

4.2 Contractual Overrides

- Refund terms defined in enterprise contract override standard policy
- Dedicated account manager approval required for any exception

4.3 Bulk Licensing Agreements

- Refunds are evaluated on a prorated contract basis
 - Multi-seat licenses may have separate evaluation rules
-

5. Approval Thresholds

Refunds are processed based on financial and risk thresholds.

5.1 Automated Approval

- Refunds $\leq$ \$100: Auto-approved by system
- Duplicate charges: Auto-approved after verification

5.2 Human Approval Required

- Refunds between \$100 – \$1000 require Tier 2 support approval
- Subscription disputes require manual verification

5.3 High-Value Escalation

- Refunds $>$ \$1000 require:
 - Finance team approval
 - Account manager validation
 - Audit log entry
-

6. Fraud & Abuse Prevention

To protect the platform:

- Repeated refund requests are flagged
 - Suspicious activity triggers account review
 - Refund abuse may lead to account restriction
-

7. Workflow Integration (For AI System)

This policy is used by the Agentic AI system to:

- Validate refund eligibility automatically
 - Determine escalation level
 - Trigger approval workflows
 - Generate structured refund tickets
-
