

FlowSync – Feature Usage Guide

1. Overview

This document provides user-facing guidance on how to use core features of FlowSync, a B2B SaaS productivity platform.

It is designed to help both customers and AI support agents answer common usability questions such as:

- How to create projects
 - How to assign tasks
 - How to use analytics dashboard
 - How to configure integrations
-

2. Project Management

2.1 Creating a Project

Steps:

1. Navigate to the **Projects Dashboard**
2. Click on **"Create New Project"**
3. Enter project details:
 - Project Name
 - Description
 - Team Members
 - Deadline (optional)
4. Click **Create Project**

Result:

- Project is added to dashboard
 - Default workspace is created automatically
-

2.2 Editing a Project

Users can update:

- Project name
- Description
- Team members
- Timeline

Steps:

1. Open project
 2. Click **Settings**
 3. Modify required fields
 4. Save changes
-

2.3 Deleting a Project

Steps:

1. Open project settings
2. Scroll to bottom
3. Click **Delete Project**
4. Confirm action

Warning:

- Deletion is permanent after 30-day recovery window
-

3. Task Management

3.1 Creating a Task

Steps:

1. Open a project
 2. Click **"Add Task"**
 3. Enter:
 - Task title
 - Description
 - Priority
 - Due date
 4. Assign to a team member
 5. Click **Save**
-

3.2 Assigning Tasks

Tasks can be assigned to:

- Individual users
- Teams

Steps:

1. Open task
 2. Click **Assign User**
 3. Select user/team
 4. Confirm assignment
-

3.3 Updating Task Status

Available statuses:

- To Do
- In Progress
- In Review
- Completed

Steps:

1. Open task
 2. Select status dropdown
 3. Update status
-

3.4 Task Prioritization

Priority levels:

- Low
 - Medium
 - High
 - Critical
-

4. Analytics Dashboard

4.1 Overview

The analytics dashboard provides insights into:

- Project progress
 - Task completion rates
 - Team performance
 - Productivity trends
-

4.2 Accessing Dashboard

Steps:

1. Navigate to main menu
 2. Click **Analytics**
 3. Select project or workspace
-

4.3 Key Metrics

Productivity Metrics

- Tasks completed per week
- Average task completion time

Project Metrics

- Progress percentage
- Delayed tasks count

Team Metrics

- Workload distribution
 - Individual contribution tracking
-

4.4 Filters

Users can filter data by:

- Date range
 - Team member
 - Project
 - Task status
-

5. Integration Setup

FlowSync supports multiple integrations including Slack, Jira, GitHub, Google Drive, and Microsoft Teams.

5.1 General Integration Setup Flow

Steps:

1. Go to **Settings → Integrations**
 2. Select desired integration
 3. Click **Connect**
 4. Authorize permissions via OAuth
 5. Confirm connection status
-

5.2 Managing Integrations

Users can:

- Enable/disable integrations
 - Reconnect disconnected services
 - Modify permissions
-

5.3 Integration Status Indicators

-  Active: Fully connected
 -  Warning: Partial sync or permission issue
 -  Disconnected: Requires reauthorization
-

6. Notifications & Alerts

6.1 Types of Notifications

- Task assignments
- Project updates
- Integration alerts
- System incidents

6.2 Notification Channels

- In-app notifications
 - Email alerts
 - Slack / Teams (if integrated)
-

7. Search & Navigation

Users can search across:

- Projects
- Tasks
- Files
- Team members

Steps:

1. Use top search bar
 2. Enter keyword
 3. Filter results by category
-

8. Common User Questions (Mapped for AI)

“How do I create a project?”

→ Use Project Management → Create Project steps

“How do I assign a task?”

→ Use Task Management → Assign Tasks section

“Where can I see progress?”

→ Analytics Dashboard → Key Metrics

“How do I connect Slack?”

→ Integration Setup → Slack OAuth flow

9. AI System Usage (Agentic Integration)

This document is used by AI agents to:

- Answer feature usage questions
 - Guide step-by-step user workflows
 - Reduce support ticket creation
 - Provide contextual help during conversations
 - Link user queries to correct feature explanations
-
